Subject	Grade	Subject	Grade
Mathematics	A	ICT	A
History	B	English Language	B
Aesthetic (Art)	B	Sinhala	C
Religion	C	Geography	C
Science	C		

ABOUT ME

As a practice, I started Software Development in 2016 with Building Desktop Application for Windows Systems, Then I moved into Full Stack Development (Mainly Backend Development) in NodeJS Eco-System. Then I became a MERN Stack Developer with Both Frontend and Backend Best Practices.

In everyday I'm looking into what are the latest technological trends and how to apply them into real world applications with my development skills. After few years as a MERN Stack Developer with industrial experiences, I mastered in DevOps Practices, Cloud Computing (AWS & GCP), Serverless Architecture with Cloudflare, AI Integrated Development and Mobile Application Development.

Currently I'm working on very flexible tech stacks with gaining AI Integrated Development experiences without stuck into a primary practice.

CORE COMPETENCIES

Full Stack Development

End-to-end application development from UI to database architecture

System Architecture

Designing scalable, maintainable software architectures

API Development

RESTful & GraphQL APIs with best practices and documentation

Agile & Collaboration

Experience with Scrum, Git workflows, and team collaboration

Cloud & DevOps

CI/CD pipelines, containerization, and cloud deployments

Problem Solving

Analytical thinking with focus on clean, efficient solutions
